

GGT-Arpolith *The organic Dust Control product*

The Product

- Non-toxic; biologically degradable.
- Remains effective for at least 2 years.
- Stores water at up to 30x's its weight.
- Made of volcanic flour in combination with Sand and mineral nutrients.
- Can be used with Magnesium Chloride: Arpolith's polymer structure binds the $MgCl_2$, which helps it stay in the footing longer. Specifically, in outdoor arenas the $MgCl_2$ won't wash out so quickly. (It lasts approx. 30% longer).

One 44 lb bucket covers 1070 sqft..

Product Benefits & Performance

- **GGT-Arpolith** granules swell as they absorb the water. Water is released again as the surrounding soil gets dryer. At the same time the granules shrink. Excessive water runs through, thus avoids stagnant moisture
- Easy to install.
- Can be used with any type of sand.
- Can be used on indoor or outdoor arenas.
- Reduces dust- good for respiration!
- Lengthens the time between watering.
- Creates a non-slip, elastic footing.
