

## Installation Manual GGT Arpolith Granulate

Dear customer and horse enthusiast!

Here are some directions on how to apply the GGT Arpolith granulate to your arena:

1. Break up the footing well using your GGT Groomer (make sure not to hurt your base!)
2. Distribute the GGT Arpolith evenly; either by hand or use of your tractor and fertilizer spreader.

Usage: Depending on depth of footing 0.4 to 0.6 lbs/sqft

Footing Depth	GGT Arpolith	Discipline
up to 4 inch	0.04 lbs per sqft	Jumper, Dressage, Western Pleasure
4 to 6 inch	0.05 lbs per sqft	Jumper, Dressage, Western Pleasure
6 inch and more	0.06 lbs per sqft	Jumper, Dressage, Western Pleasure
	0.02 lbs per sqft	Reining
	0.06 lbs per sqft	Cutting, Barrel Racing

3. Blend the GGT Arpolith well and homogenous into your footing using your GGT Groomer.
4. Water your footing heavily (first application only); at least 0.4 gallons per sqft

### Characteristics:

GGT Arpolith stores the thirtyfold of its own weight in water and is biologically degradable. It reduces significantly dust in riding halls, saves water and labor cost and prevents waterlogging in outdoor arenas. Also suitable for matured footings to improve soil structure.

Effectiveness:

Guaranteed for 2 years. Then its functionality decreases, but it can be restored at 100 % by incorporating new GGT Arpolith again. Compatible with magnesium chloride and resistant to ammonia!

For further information, please do not hesitate to contact us. Give us a call!
