

Hello!

Thank you for your interest in GGT Footing, we are happy to help! Would you please answer the following questions to give us a better idea of how to best suit your needs?

1. How did you hear about GGT Footing?
2. Are you planning on using an Arena Builder? Or doing a Self-Installation?
3. **Arena Details:**
 - a. Is it an existing arena, or will you be building a new one?
 - b. Dimensions:
 - c. Primary discipline/use of your arena?
 - d. What is the base of your arena?
 - e. If existing, what type of sand?
How many inches deep?
 - f. Are you happy with your current sand?
If not, then what properties do you wish to correct?
If we determine that your sand is not suitable for GGT-Footing products, are you open to adding new sand to your arena?
 - g. Does it have a draining system?
 - h. Is it Indoor, Outdoor, or Covered?
 - i. How many horses use the arena on a daily basis?
 - j. Do you have an irrigation system?
 - k. Is your arena level? (Ideally with laser guided equipment)
If so, when was it done?
 - l. Would you mind sending us a current picture of your arena?
4. Do you have a groomer? If so, what type? (Please send photo)
5. What type of tractor do you have / horsepower?
Width (outside of rear tire to outside of other rear tire)
6. In your personal opinion, what is the ideal footing texture? (Tight, fluffy, etc.)

7. What is your timeframe?
8. What is your estimated budget for this project?
9. **Contact Information:**
 - a. Name:
 - b. Farm Name:
 - c. Phone#:
 - d. Email:
 - e. Billing Address:
10. **Shipping Details:**
 - a. Farm Address: (If different than billing)
 - b. Who will be the person on the farm to contact at delivery?
Phone number:
 - c. Can a 53 foot truck easily access your facility?
 - d. For unloading:
 - i. Do you have a Pallet jack? Forklift? A loading dock?
 - ii. What type of surface will the footing be unloaded on?
 - iii. How will you move it from the drop off location to your arena?

For Maintenance: Our products do require regular maintenance with watering and grooming. An irrigation system is ideal, with a recommended 60 PSI and 50 gallons/minute, but other ways of adding water to the arena work as well. Also, we do have a waterless footing option that may work best for your particular needs. To protect your investment in your new riding arena, it is imperative that you maintain the surface with a proper arena conditioner. We would be happy to speak with you about grooming options. We do offer a GGT Footing arena groomer that is specifically designed to properly mix the materials and keep a consistent, level footing.

Feel free to contact us with any questions, we are happy to help!

Thank you,

GGT- Footing TMSales Team
